10808 Highway 93, Unit A
Golden, CO 80403-8200

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has received your letter dated October 19, 2004 which transmits the Final Pre-Demolition Survey Reports (PDSRs) for Areas I, II and III of Building 776/777. Edd Kray of our staff has reviewed these reports and concurs that they adequately reflect the current radiological status of the areas.

Irrespective of the fact that these PDSRs are labeled as being "final", CDPHE does not consider them so. Additional work is planned in Area III, and this will alter the final pre-demolition configuration and content of the data for this area. Specifically, the north wall of Area III is planned for removal well before the final building demolition. Overall source term content for Area III will be significantly decreased by this activity. Additionally, some contamination may be spread to other areas as this wall is removed, which will necessitate additional surveys and possibly some decontamination and/or application of additional fixatives. This will require submission of a revised final PDSR to us. We have discussed this need with your staff and they agree that this will be necessary.

If you have any questions regarding this correspondence, please contact me at (303) 692-3367, or Edd Kray at (303) 966-2115.

Sincerely,
